The online meetings will focus on the main sectors of Textile and Clothing Industry and beyond and will aim to present the IMA proposal for the various types of production. In each webinar there is at least one testimony from our customers who already use IMA technology and an in-depth analysis of the fundamental guidelines to face the right investment also based on the own production capacities and characteristics.

A strategic growth that arises primarily from the correct analysis of the needs and requirements to be met in order to find the most suitable answer in IMA spa. Numerous technological solutions, all in an Industry 4.0 key, thanks to the forty-year experience of the company that today covers the worldwide market, both for the quality and flexibility of its products and for its ability and strength to offer complete solutions in the Cutting Room.
